Nothing to report

[\[Return to top\]](#)

## **Government Facilities Sector**

26. *August 8, Associated Press* – (California) **3 hurt in S. California wildfire; some can't evacuate.** Evacuations were ordered for several communities after a wildfire broke out August 7 in the mountains near Banning and burned over 6,000 acres. Three people were injured and about a dozen structures were damaged or destroyed.

Source: <http://news.msn.com/us/3-hurt-in-s-california-wildfire-some-cant-evacuate>

27. *August 8, Associated Press* – (Missouri) **Campground evacuated, some water rescues in SW Missouri.** Flash flooding prompted authorities to evacuate campgrounds in Roaring River State Park and a campground near Blue Eye in Missouri August 8.

Source: <http://stlouis.cbslocal.com/2013/08/08/campground-evacuated-water-rescues-missouri/>

28. *August 8, Virginian-Pilot* – (Virginia) **Network outage cripples Chesapeake City Hall.** Communication services including email, telephone services, and online services were down for several hours August 7 at the Chesapeake City Hall in Virginia due to an apparent failure in the computer network.

Source: <http://hamptonroads.com/2013/08/network-outage-cripples-chesapeake-city-hall>

29. *August 7, Riverhead Patch* – (New York) **Cops: 4 children, 4 adults injured in school bus accident, none seriously.** A school bus heading to the Long Island Aquarium rear-ended a truck August 7 in Riverhead and left 4 students and 5 adults injured.

Source: <http://riverhead.patch.com/groups/police-and-fire/p/cops-no-serious-injuries-in-main-street-school-bus-accident>

30. *August 7, Baltimore Sun* – (Maryland) **FBI investigating apparent bomb threat left at representative's office.** A Maryland congressman's office was evacuated for several hours August 7 after staff members discovered 10 globs of a putty-like substance and wiring on the door. A bomb squad cleared the scene and officials stated the suspicious object was not hazardous.

Source: <http://www.baltimoresun.com/news/maryland/crime/blog/bs-md-cummings-suspicious-substance-2-20130807,0,814851.story>

31. *August 7, KYW-TV 3 Philadelphia* – (Pennsylvania) **3 injured in gas leak, fire at Rosemont College.** Evening classes at Rosemont College in Montgomery County, Pennsylvania, were cancelled August 7 after three people were injured when a contractor accidentally struck a gas main that ignited a fire.  
Source: <http://philadelphia.cbslocal.com/2013/08/07/2-injured-in-gas-leak-fire-at-rosemont-college/>
32. *August 7, Ventura County Star* – (California) **University Park, damaged by Springs Fire, reopens.** Officials at California State University Channel Islands reopened University Park the week of August 5 after the Springs Fire burned through as much as 75 percent of the park.  
Source: <http://www.vcstar.com/news/2013/aug/07/university-park-damaged-by-springs-fire-reopens/>
33. *August 7, Fresno Bee* – (California) **Aspen fire reported 80% contained.** Firefighters reached 80 percent containment August 7 of the 21,931-acre Aspen Fire burning north of Huntington Lake.  
Source: <http://www.fresnobee.com/2013/08/07/3429755/aspen-fire-reported-80-contained.html>
34. *August 7, El Paso Times* – (Texas) **Sul Ross State University lockdown lifted after unconfirmed reports of gunman (updated).** Police locked down Sul Ross State University in Texas for over 3 hours August 7 after reports of a man allegedly carrying a rifle on campus. Officials gave an all clear after conducting a search of the campus, while the university cancelled classes and closed offices.  
Source: [http://www.elpasotimes.com/newupdated/ci\\_23810828/odessa-american-sul-ross-state-university-lockdown-after](http://www.elpasotimes.com/newupdated/ci_23810828/odessa-american-sul-ross-state-university-lockdown-after)

[\[Return to top\]](#)

## **Emergency Services Sector**

Nothing to report

[\[Return to top\]](#)

## **Information Technology Sector**

35. *August 8, The Register* – (International) **HP plugs password-leaking printer flaw.** HP released patches for several models of LaserJet Pro printers that closes a vulnerability caused by hardcoded URLs in the printers' firmware which could allow an attacker to extract plaintext user passwords.  
Source: [http://www.theregister.co.uk/2013/08/08/hp\\_plug\\_password\\_leaking\\_printer\\_vuln/](http://www.theregister.co.uk/2013/08/08/hp_plug_password_leaking_printer_vuln/)

36. *August 8, Help Net Security* – (International) **Chrome not the only browser that stores plain-text passwords.** Google responded to a software developer's post that discussed how the Chrome browser displays saved passwords by stating that if an attacker compromises a user's operating system account then there would be insufficient means to prevent them from accessing passwords. Several security researchers debated whether the saved passwords systems represent a security threat, while one noted that Firefox also stores passwords in a similar manner.  
Source: <https://www.net-security.org/secworld.php?id=15376>
37. *August 7, Threatpost* – (International) **Remotely exploitable bug affects wide range of Cisco telepresence systems.** Cisco issued an advisory after a serious vulnerability in its TelePresence system caused by default credentials in the system that could be used by an attacker to gain complete control of the Web server on which the system is running. Workarounds were listed for use until a patch can be issued.  
Source: <https://threatpost.com/remotely-exploitable-bug-affects-wide-range-of-cisco-telepresence-systems/101910>
38. *August 7, Softpedia* – (International) **Malware developers migrate ZeuS P2P protocol to new port range.** Researchers at Damballa found that the developers of the GameOver peer-to-peer (P2P) version of the ZeuS malware have begun migrating the P2P protocol to a new port range.  
Source: <http://news.softpedia.com/news/Malware-Developers-Migrate-ZeuS-P2P-Protocol-to-New-Port-Range-373868.shtml>
39. *August 7, The Register* – (International) **Malicious snoopware targeting India found at tiny Midwest ISP.** ThreatConnect researchers traced a malware-based cyberespionage campaign targeting India to a small internet service provider (ISP) in Kansas City, Missouri. The researchers found booby-trapped .PDF files and Flash video files used in the campaign, as well as a .ZIP file of malware on the ISP's systems.  
Source: [http://www.theregister.co.uk/2013/08/07/india\\_cyberespionage/](http://www.theregister.co.uk/2013/08/07/india_cyberespionage/)
40. *August 7, Softpedia* – (International) **Reveton malware uses fake AV to help crooks make a profit.** ThreatTrack Security researchers identified a variant of the Reveton ransomware that uses a fake antivirus program called Live Security Professional to lure users into pay the cybercriminals behind it. The ransomware is distributed using the Sweet Orange exploit kit.  
Source: <http://news.softpedia.com/news/Reveton-Malware-Uses-Fake-AV-to-Help-Crooks-Make-a-Profit-373736.shtml>
