Financial Services Sector

- 6. August 7, Bloomberg News (International) U.S. charges 13 with spreading \$77 million in fake bills. Thirteen suspects arrested by U.S. Secret Service agents in May and June were indicted in federal court August 7 for allegedly operating a major counterfeit currency ring that distributed over \$77 million in fake bills in several States along the East Coast since at least 1999. The fake bills were believed to have been manufactured in Israel, and the group allegedly established a counterfeit bill printing press in New Jersey in January 2014.
 - ${\bf Source:} \ \underline{http://www.businessweek.com/news/2014-08-07/u-dot-s-dot-charges-13-withspreading-77-million-in-fake-bills}$
- 7. August 7, Miami Herald (Florida) TotalBank responds to computer security breach. Miami-based TotalBank notified 72,500 customers after an investigation revealed that unauthorized individuals may have accessed the bank's systems and obtained customer names, account numbers, addresses, account balances, and other personal information. The bank stated that it took action to secure its systems and is continuing to investigate.

8. August 7, IDG News Service – (International) Some mobile POS devices still affected by critical flaws months after patch. A researcher with MWR InfoSecurity and a colleague presenting at the Black Hat 2014 conference detailed how flaws in mobile point of sale (mPOS) devices from several manufacturers may be vulnerable to being taken over by attackers using customized smart cards in order to steal the payment card information read by the devices. The researchers reported the flaws previously and a patch for the EMV library was released in April, but some vendors have yet to push out the update to their devices, leaving the devices vulnerable.

Food and Agriculture Sector

- 12. August 8, KMGH 7 Denver (Colorado) Fort Collins restaurant Tortilla Marissa's reopens after Hepatitis A outbreak. Tortilla Marissa's North of the Border Cafe in Fort Collins, the restaurant linked to a possible Hepatitis A outbreak, will reopen August 9 after it voluntarily closed for 6 weeks to undergo a deep clean and inspection by the Larimer County Department of Health. Hundreds of patrons received vaccination shots after a worker at the restaurant tested positive for Hepatitis A in June. Source: http://www.thedenverchannel.com/news/local-news/fort-collins-restaurant-tortilla-marissas-reopens-after-hepatitis-a-outbreak
- 13. August 7, Associated Press (Wisconsin) Manure digester explosion sparks fire. Officials believe an explosion that destroyed the \$250,000 nylon inflatable roof of a 1.25-million gallon manure digester at the Clear Horizons LLC biodigester near Waunakee was caused by the ignition of methane gas when an employee started an

electric blower. The digester was taken offline indefinitely while authorities investigate and determine if the biodigester is safe to resume operations.

Government Facilities Sector

19. August 7, Associated Press – (Oregon; Idaho; Washington) Evacuated after Oregon fire, some residents return. Evacuation orders for some residents living in Oregon's Columbia Gorge were lifted August 7 while fire crews continued to battle the Rowena Fire which grew to 4.1 square miles. Firefighters also worked to contain numerous wildfires burning in Idaho and Washington which have combined, burned thousands of acres and destroyed several homes and structures.

Source: http://news.msn.com/us/evacuated-after-oregon-fire-some-residents-return

20. August 7, Los Angeles Times – (California) Hunter charged with sparking massive Rim fire, state's third-largest. A hunter was charged by a federal grand jury August 7 with starting a campfire in the Stainislaus National Forest in August 2013 that spread to become the Rim Fire burning over 250,000 acres in and around Yosemite National Park. The fire left 10 people injured and burned more than 100 structures in addition to causing significant environmental damage.

Return to top

Information Technology Sector

23. August 8, Softpedia – (International) Network access storage devices are highly exploitable. A researcher from Independent Security Evaluators presenting at the Black Hat 2014 conference reported finding a wide variety of vulnerabilities in network access storage (NAS) devices from several manufacturers, including directory traversal, command injection, memory corruption, authentication bypass, or back door vulnerabilities.

Source: http://news.softpedia.com/news/Network-Access-Storage-Devices-Are-Highly-Exploitable-454103.shtml

- 24. August 8, Help Net Security (International) Critical bug in WordPress plugin allows site hijacking. Sucuri researchers identified and reported a vulnerability in the Custom Contact Forms plugin for WordPress that could allow attackers to take control of sites using the plugin. The developers of Custom Contact Forms published an update for the plugin after the issue was published by the WordPress Security team. Source: http://www.net-security.org/secworld.php?id=17227
- 25. August 8, Help Net Security (International) **Two Gameover Zeus variants targeting Europe and beyond.** Researchers at Bitdefender identified two Gameover Zeus variants in the wild, one botnet primarily targeting the U.S. while the second targets Belarus and Ukraine. The first botnet is generating around 1,000 domains per day while the second generates 10,000 per day but appears to currently be inactive. Source: http://www.net-security.org/malware_news.php?id=2833
- 26. August 8, Securityweek (International) Cybercriminals steal cryptocurrency via BGP hijacking. Researchers with Dell SecureWorks reported finding cybercriminals using fake Border Gateway Protocol (BGP) broadcasts to redirect traffic from cryptocurrency mining pools to servers they control, diverting tens of thousands of dollars in cryptocurrency. The attackers compromised 51 mining pools hosted on 19 hosting companies.

Source: http://www.securityweek.com/cybercriminals-steal-cryptocurrency-bgp-hijacking

27. August 7, Securityweek – (International) Attackers used multiple zero-days to hit spy agencies in cyber-espionage campaign. Kaspersky Lab researchers identified the infection methods used in the Epic Turla cyber-espionage campaign (also known as

Snake or Uroburos) that targeted intelligence agencies, military organizations, government agencies, education institutions, pharmaceutical companies, and research groups in over 45 countries. The attackers behind the campaign used several malware platforms and zero-day exploits in Windows XP and Server 2003 and Adobe Reader to infect systems and then could upgrade the malware with additional capabilities once in place.

Source: http://www.securityweek.com/attackers-used-multiple-zero-days-hit-spy-agencies-cyber-espionage-campaign

28. August 7, Dark Reading – (International) Attack harbors malware in images. A researcher with Dell SecureWorks reported finding the Lurk malware being distributed within a fake digital image as part of a click fraud campaign that infected around 350,000 systems. The malware in the campaign was spread through iFrames on Web sites containing an Adobe Flash exploit, and required victims to have a vulnerable version of Adobe Flash that is used to download the fake image file, which contains an encrypted URL that downloads a second malicious payload.

 ${\bf Source:} \ \underline{http://www.darkreading.com/endpoint/attack-harbors-malware-in-images/d/d-id/1297867}$

29. August 7, Securityweek – (International) Flaws in email and Web filtering solutions expose organizations to attacks: Researcher. A researcher at NCC Group presenting at the Black Hat 2014 conference published two whitepapers outlining how email and Web filtering solutions can be used by attackers in the reconnaissance phase of attacks to obtain information on a potential target network if the attackers can determine which products or services are being used on the target network.

Source: http://www.securityweek.com/flaws-email-and-web-filtering-solutions-expose-organizations-attacks-researcher

Commercial Facilities Sector

31. August 8, Kansas City Star – (Missouri) Children escape injury when Kansas City church collapses. Sixty-three children and staff members attending a vacation bible school held by Rio de Agua Viva were safely evacuated from a Kansas City church August 7 as the building partially collapsed. Authorities believe the structural collapse may be a result of heavy rain that caused gutters to clog.

Source: http://www.kansascity.com/news/local/article1164274.html

32. August 8, WCAU 10 Philadelphia – (Pennsylvania) 1 Hurt, 25 impacted as fire burns through Montco apartments. Authorities are investigating after up to 25 residents were displaced from about 8 units at the Woods Apartment Complex in Ambler due to a fire that tore through the building August 8. One resident was transported to an area hospital with symptoms of smoke inhalation.

Source: http://www.nbcphiladelphia.com/news/local/Woods-Upper-Dublin-Fire-270445781.html

33. August 7, KDFW 4 Dallas – (Texas) Arsonist closes Lancaster Walmart with fake flower fire. Authorities are searching for a suspect that was caught on surveillance video setting artificial flowers on fire inside a Walmart store in Lancaster, Texas, August 5. The building's sprinkler system was activated by the fire and the store remained closed until at least August 8.
