19. *July 30, Baltimore Sun* – (Maryland) **Estimated 2 million gallons of sewage spill into Patuxent River.** Maryland officials issued an emergency closing of the Patuxent River from the Howard County line to the Baltimore Washington Parkway in Laurel after a blocked sewer line caused approximately 2 million gallons of sewage to overflow into the Patuxent River July 29. Officials closed Riverfront Park in Laurel and urged residents to avoid the area.
Source: <http://www.baltimoresun.com/news/maryland/howard/laurel/ph-ho-cf-glances-sewage-overflow-0804-20160729-story.html>

Healthcare and Public Health Sector

20. *July 30, Associated Press* – (California) **4 killed after small medical plane crashes in California.** A Cal-Ore Life Flight medical transport plane crashed in a forest range near the Arcata-Eureka Airport in northern California July 29 after the pilot reported smoke in the cockpit. The National Transportation and Safety Board reported that four bodies were recovered and the cause of the crash remains under investigation.
Source: <http://www.fireengineering.com/ap-news/2016/07/30/4-killed-after-small-medical-plane-crashes-in-california.html?dct=2>
21. *July 29, CNN* – (Florida) **Florida health officials confirm Zika transmission.** Officials from the Florida Department of Health reported July 29 that 4 individuals in Miami-Dade and Broward counties have been infected with the Zika virus transmitted through infected mosquitoes in the area, marking the first cases of mosquito-borne transmissions in the U.S. Health officials are collecting information and urine samples from residents in the area as part of an effort to determine how many people have been infected.
Source: <http://www.cnn.com/2016/07/29/health/florida-health-officials-confirm-local-zika-transmission/>

Government Facilities Sector

22. *August 1, Fresno Bee* – (California) **Wildfire near Prather damages homes, burns 1,800 acres; 15 percent contained.** Crews reached 15 percent containment August 1 of the Goose Fire which has burned 1,800 acres, damaged 300 homes, and threatens 200 more near Prather, California. Officials issued mandatory evacuation orders to the area from Gooseberry Lane to Morgan Canyon Road and Gooseberry Lane to Lodge Road.
Source: <http://www.fresnobee.com/news/local/article92934807.html>
23. *July 31, San Francisco Bay City News; KABC 7 Los Angeles* – (California) **Monterey Co. issues more evacuation orders due to Soberanes Fire.** Crews reached 15 percent containment July 31 of the Soberanes Fire which has burned 40,000 acres, threatens over 2,000 structures, and destroyed 57 homes north of Big Sur in California. Officials issued mandatory evacuation orders for portions of Cachagu and Tassajara.
Source: <http://abc7news.com/news/monterey-co-issues-more-evacuation-orders-due-to-soberanes-fire/1451112/>
24. *July 31, KIMA 29 Yakima* – (Washington) **Range 12 Fire: Officials say at 50,000 acres; burning in Yakima, Benton counties.** Crews were working July 31 to contain the more than 50,000-acre Range 12 Fire burning in Yakima and Benton counties in Washington. Officials closed surrounding roads as a precaution.
Source: <http://kimatv.com/news/local/training-center-fire-officials-say-now-at-25000-plus-acres-entered-into-benton-county>

Emergency Services Sector

25. *July 29, Birmingham News* – (Alabama) **Fire chief stole more than \$20,000 from department, records claim.** The chief of the Collins Chapel Fire Department in Thorsby, Alabama, was arrested and charged July 28 for allegedly stealing more than \$20,000 from the fire department between January 2013 and June 2016 after he cashed checks from the department's Peoples South Bank in Clanton at a local business. The investigation is ongoing.

Information Technology Sector

26. *July 30, Softpedia* – (International) **Major cyber-crime campaign switches from CryptXXX to Locky ransomware.** Researchers from Palo Alto Networks reported that Afraidgate, the largest source of ransomware infections via exploit kits (EK), stopped delivering the CryptXXX ransomware and began distributing the Locky Zepto variant after switching from Angler to the Neutrino EK. Researchers stated that Afraidgate relies on malicious actors hacking Websites and adding malicious code to the site to redirect users to the Neutrino EK, which are easy to discover due to the “.top” domain extensions.

Source: <http://news.softpedia.com/news/major-cyber-crime-campaign-switches-from-cryptxxx-to-locky-ransomware-506801.shtml>

27. *July 30, Softpedia* – (International) **IP of ancient Conficker C&C domains resurfaces in new website hacking scheme.** Sucuri's forensic team discovered hacked Websites were redirecting their own traffic to one of their subdomains hosted on another server, prompting an investigation into the Websites which revealed the sites had been registered through NameCheap and were abusing the company's FreeDNS service to hijack legitimate sites by redirecting domain name queries to the server's IP address, which had been previously used to host command and control (C&C) servers for the Conficker malware.

Source: <http://news.softpedia.com/news/ip-of-ancient-conficker-c-c-domains-resurface-in-new-website-hijacking-scheme-506797.shtml>

28. *July 29, SecurityWeek* – (International) **New “QRLJacking” attack targets QR code logins.** An independent researcher discovered that the Quick Response (QR) Login process is susceptible to a RLJacking attack after finding a hacker could access the login QR code from the target Website and place it into a phishing page in order to trick the user into visiting the page and logging into the QR login process, thereby sending the secret login token to the hacker instead of the authenticated Website and allowing the hacker to hijack the session. Researchers stated that the attack can be avoided by opting out of the QR Login feature and using a regular password for sites and apps that offer QR logins.

Source: <http://www.securityweek.com/new-qrjacking-attack-targets-qr-code-logins>

29. *July 29, IDG News Service* – (International) **Android trojan SpyNote leaks on underground forums.** Researchers from Palo Alto Networks reported a new Android trojan dubbed SpyNote has been leaked on several underground forums and allows hackers to steal users' messages and contacts, record audio using the device's built-in microphone, listen in on an user's calls, and control the device's camera, among other illicit actions. Researchers stated the trojan, which prompts users for a long list of permissions on installation, is capable of updating itself and installing other rogue applications on the device.
